Work Experience

Binaryveda

July. 2021 - Present

Frontend Developer

- Spearheaded the development of web applications, translating design wireframes into functional web components. This contributed to an enhanced user experience and increased user engagement on various projects.
- Collaborated with backend developers and designers, fostering cross-functional teamwork. Leading to streamlined workflows and accelerated project completion.
- Implemented mobile-first design, ensuring app responsiveness and user-friendliness. This approach ensured a consistent and user-friendly experience across devices and boosted the accessibility and usability of our applications.
- Cultivated a collaborative environment through active participation in knowledge-sharing sessions within the team.
- Worked on multiple projects and modules, built a product landing page and web app from scratch, resulting in a ownership of large code base development and responsibilities.

Technical Skills

- Languages : Javascript, Typescript, HTML, CSS
- Frontend Frameworks: ReactJS, NextJs
- CSS Frameworks: Material UI, Tailwind CSS, Chakra UI , Bootstrap, SCSS.
- Web Animations library : Framer Motion, Gsap, 3JS.
